

THE ULTIMATE
CHECKLIST
FOR GROWING
ORGANIC
FOOD AT
HOME

The Ultimate Checklist to Growing Organic Food at Home

1. **Where are you going to plant?**

Depending on your space, working out the best place to plant in or around your house before you do anything else will help determine what your going to plant.

2. **What are you going to plant in?**

Pots, Garden Beds, In the Ground, Grow Wall.

3. **Soil**

Getting your soil right will determine the success for your plant. Remember that what goes into your soil will also be taken up by your plant, and ultimately eaten by you and your family.

4. **Seeds and Seedlings**

Make sure you source your seeds and seedling from a good certified organic provider.

5. **How are you going to look after your plants?**

Natural fertilisers, water, sunshine.

6. **Planning**

What foods are you going to grow? Are you planting seeds or seedlings?

7. **Harvesting**

Know what to look out for when you're harvesting your plants. When the ultimate time to pick them for maximum flavor and yield.

8. **Adding Nutrients**

Understanding layering techniques and fertilisers to add nutrients to your plants.

9. **Companion Plant**

Plant foods next to those that support each others growth, including plants that bring beneficial bugs.

10. **Turning Over Soil**

After you harvest, understand how to add nutrients back to your soil before you plant for the next season.
